

# Hot InaZma

~ホット・イナズマ エコ~

**Fuel Cost Saving**

**Reduced Emissions**

Also other good qualities of this product!

Longer lasting battery

better engine performance

audio noise reduction

headlight brightness quality

Hyper Voltage System is an innovative new product for harnessing the full potential of your vehicle's electrical system.

Our original design utilizes the latest technology to stabilize the voltage in your vehicle. The vehicles voltage will drop when electrical components are in use and when the car is under acceleration; Hyper Voltage System stores electricity to provide constant voltage to your electrical system.

Maximizing the efficiency of your cars electrical system will result in a performance increase.

The ignition system and electrical components draw power from the electrical system, resulting in a power loss. Using Hyper Voltage System can release your vehicle's full potential.

## Fuel Cost Saving

Just install and watch how much you save!

Fuel cost saving-annual gas saving. Reduce Emission-30% reduction of hydrocarbon in Exhaust gas.

① 1500cc

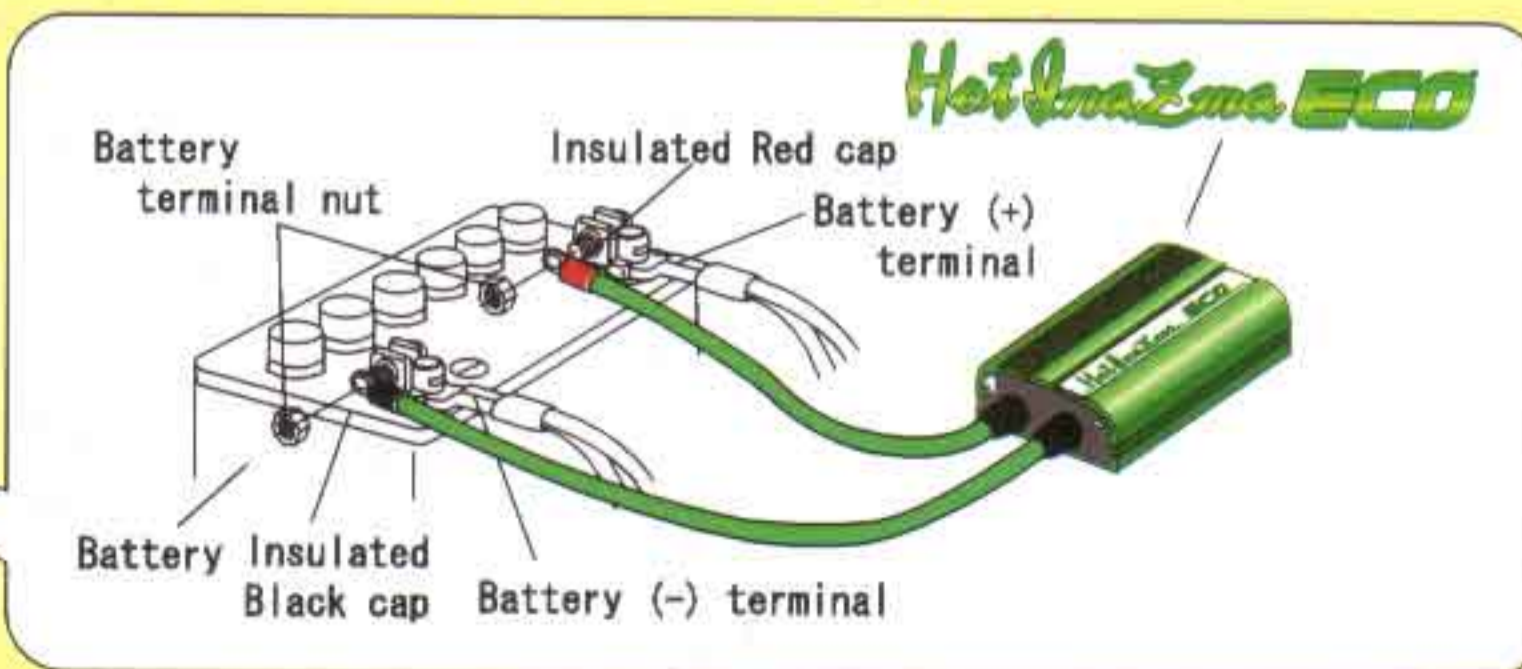

② 3000cc

## Installation is easy as plugging the battery [-] and [+].

The figure below becomes an installation example, please install it accordingly.

- Following is an example of Installation, mounting position should be altered depending on the vehicle.
- The figure below becomes an installation example, please install it accordingly.

\*Actual effectiveness varies by vehicle.

\*Actual effectiveness varies by personal drivability.
